

Mariia Naumenko

QA Engineer

Odesa, Ukraine | maria.igorevna9@gmail.com | +380 63 938 21 33 | t.me/MaruN90 | github.com/MNaumenko90

SUMMARY

QA Engineer with 6+ years of experience in manual testing of mobile (iOS/Android) and web applications for product teams. Specialize in functional, regression, and smoke testing of complex multi-layer interfaces — from product catalogs and business-logic-heavy widgets to profile and checkout flows. Write test cases, checklists, and bug reports that developers resolve on the first pass, without follow-up questions. Mentor new QA team members. Completed a dedicated automation course (Selenium WebDriver, TestNG, Java) and looking to apply and grow these skills in a hands-on project setting.

SKILLS

Test Design & Methodology	SDLC, Agile/Scrum, test cases, checklists, test plans, requirements-based testing, test design techniques (equivalence partitioning, boundary value analysis)
Testing Types	Functional, regression, smoke, performance, GUI testing, cross-browser & cross-platform testing
Tools	Jira, Confluence, TestRail, Postman, Figma, Miro, BrowserStack, Docker, Chrome/Android DevTools, Android Studio, Git
Technical Background	HTML, CSS, JS (base), API testing (HTTP methods, JSON/XML), Selenium WebDriver + TestNG fundamentals, Java (base)
Soft Skills	Mentoring new team members, cross-functional collaboration, clear written communication (bug reports & documentation)

EXPERIENCE

Manual QA Engineer Autodoc <i>Odesa, Ukraine (Remote)</i>	<i>Apr 2021 — Present</i>
- Started as a full-scope QA covering the entire Android/iOS application; for the past 1.5 years, following a move to domain ownership, own the Account domain end-to-end (login, profile, promo banners, vehicle garage/catalog), including edge cases like status/return race conditions and offline behavior. - Write and maintain test cases, checklists, and test plans in Jira/Confluence for new features and regression cycles. - Localize and document bugs following a clear standard (steps to reproduce, expected/actual behavior, environment, attachments), enabling developers to reproduce issues without follow-up questions. - Perform functional, smoke, regression, and performance testing; use Postman to validate the API layer. - Mentor and onboard new QA team members.	
Manual QA Engineer Stallko Technologies <i>Odesa, Ukraine</i>	<i>Apr 2020 — Apr 2021</i>
- Performed cross-browser and cross-platform testing of web applications and mobile clients. - Identified and localized application bugs; documented them in GitLab and Jira. - Developed test cases and checklists for new releases.	
Front-End Junior Developer Moonion <i>Odesa, Ukraine</i>	<i>Sep 2017 — Oct 2018</i>
Built UI components with React — experience that now helps me understand front-end logic, read code, and quickly localize client-side bugs when testing web applications.	

ADDITIONAL INFO

Courses & Certificates	QA Automation — Java, Hillel IT School
Languages	English — B1
Work Mode	Remote
